

PROMETHEUS

DEFENSIVE INTELLIGENCE

UTILIZE INTELLIGENCE TO PROTECT YOUR PEOPLE & YOUR ASSETS

The information age has impacted strategies and tactics for Global Security Operations, Cybersecurity Professionals, Executive Protection Agencies, Transportation Security Teams, and Fraud & Loss Prevention Professionals. Scanning the web for data and information is no longer sufficient in gathering real or actionable intelligence to protect your assets and your people. Investing the time and resources to manually examine social media channels, the dark net, the deep web, messaging applications and many other data sources for corporate & executive security, is both manpower intensive and ineffective.

Prometheus, powered by proprietary Artificial Intelligence, gives security professionals and executives an unsurpassed advantage by combing millions of data sources to identify issues or gather information on emerging situations specific to their needs. Combined with this, Raven also offers professional intelligence analysis by our cadre of former CIA Intelligence officers with decades of experience to help you interpret and digest the tailored intelligence collected.

This end-to-end solution can identify and analyze critical information from a broad range of data sources to fit your needs and specific circumstances. With customizable visualizations and real-time alerts, Prometheus enables you to better prepare your team to handle any threats or concerns to your people or assets.

Whether you are focused on security at a static location, personal protective services, defending corporate or private networks, or brand reputation & sentiment, Prometheus can adapt and provide the critical information you need.

Automated Alerts

Push notifications send real-time alerts to immediately notify you of potential threats or situations, allowing staff or security to act on them instantly and effectively.

Expert Analysis

Our cadre of former CIA Intelligence Officers leverage decades of global experience to help you interpret and understand your tailored Defensive Intelligence collection. Using proven analytical techniques, and highly honed operational skills, our consultants provide you with a wealth of information and recommendations.

Video

If you utilize video surveillance at your facilities, or as part of your counter surveillance operations, you know that monitoring video is time consuming and manpower intensive. Use Prometheus to monitor your video feeds and alert you to threats, intrusions, and other information you need.
